

Client Success Story:

Infrastructure & Networking

Client:

\$250MM luxury brand automobile dealership.

Situation:

Client was consolidating operations from 3 separate operating units/locations into a single, brand new \$85MM facility. Client needed to upgrade its technology infrastructure significantly in order to improve employee productivity, communications, and security, reduce costs, and build an image of a world-class facility.

Services:

Interim CIO, IT planning, project management, network design & implementation, IT managed services, technology training.

Auxis Role:

- Designed and implemented a state-of-the-art Microsoft network with over 500 network devices.
- Selected & managed the implementation of a Cisco Voice over IP (VoIP) phone system with wireless IP devices, unified messaging, and fax-to-the-desktop capabilities.
- Negotiated and managed all technology acquisitions and changes. (\$1.5MM in technology acquisitions)
- Oversaw construction of the facility from the ground up to accommodate all new technologies (servers, desktops, wireless, satellites, surveillance, audio, video, voice).
- Created IT support organization, provided managed services for one year, and then transitioned back to newly built, internal organization.
- Trained all users in operating system, office applications & email.
